

Important Pop-Up Safety Notice

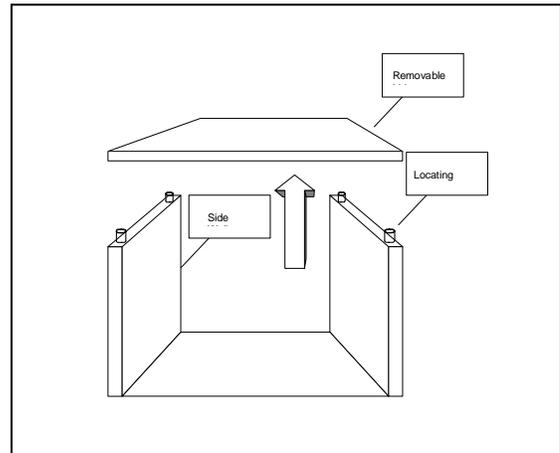

Congratulations on owning a fine piece of Bausman furniture. We hope you enjoy the remote functions that this lift unit offers. This unit contains a very powerful motor. If not operated properly, the pop-up could be a very dangerous machine. Therefore, it is very important to read the following instructions carefully before operating or installing any equipment in this unit.

Provided Safety Features

Unfastened lid

Purposely we do not use any fastening devices to attach the top of the TV compartment. This is to ensure that nothing can get caught between the front edge and the top of the TV compartment while the unit is lowering.

The four holes located on the underside of the TV compartment lid are intentionally oversized for the four locating dowels attached to the top of the TV compartment side walls. The reason for this is so that were the wood to shrink, bow or warp the top should never lose its ability to lift off with ease.

Hinged Lid Front

The back and sides of TV compartment are made flush. This eliminates the possibility of catching anything under the top when the unit is lowering down.

Should an object be inserted from the front, into the TV compartment. The lid should lift up at point of contact. Should that fail, we have devised a second feature which is a hinged section of the lid. This will raise up should the lid not.

BAUSMAN & COMPANY, INC.

FINE BENCH MADE FURNITURE

Wiring Equipment

We are now providing a pre-wired unit. We have provided three color coded RCA jacks and one coaxial cable. This means there should be no need for the back of the unit to ever be removed. Two of the RCA jacks will be used for audio left & right, the third for video. The coaxial cable will be connected to either the VCR or cable box. See component users guide.

Important things NOT to do

1. Never set heavy objects on top of the TV Cabinet. (This will restrict the top from lifting up.)
2. Never remove the back (The unit has been pre-wired) We accept no responsibility for injury. **Should the back need to be removed written authorization from the factory is required**
3. .In addition to the Safety Notice provided by Bausman & Company, the notices provided by Auton should also be read and followed.

We hope you enjoy your Bausman furniture. Please use common sense when operating this unit and keep children from using it for purposes other than that which it was intended.
